- Portuguese
- English (Advanced)

Hobbies

- Working out
- Gaming
- Watching movies and series

Summary

I am 19 years old and currently pursuing a degree in Computer Engineering at the Federal Institute of Goiano. I have knowledge of programming languages such as Python, Java, HTML, CSS, and SQL, with a strong understanding of programming logic and databases.

Objective

I am seeking an internship opportunity where I can apply and expand the knowledge gained during my academic studies. I am eager to contribute my technical skills and problem-solving abilities, particularly in software development, while continuing to learn and grow professionally. My goal is to join a team where I can develop as a professional and add value through my dedication.

Experience

• 3R Contabilidade

I currently serve as an accounting secretary, where I am responsible for the monthly registration and inventory management of goods for client companies. Additionally, I conduct searches on government portals to obtain up-to-date information about these companies throughout the month.

Formation and Courses

• Computer Engineering - Federal Institute of Goiano - currently pursuing - 6th semester

• Certified Complementary Courses:

1. Python 3 Curso Completo do Básico ao Avançado – Udemy - 26 horas
2. Curso de HTML 5 COMPLETO e com Projetos Práticos para WEB – Udemy - 18,5 horas
3. Jornada Python da Hashtag – Hashtag Treinamentos – 8 horas
4. Jornada Inteligência Artificial da Hashtag – Hashtag Treinamentos – 8 horas
5. Linguagem de programação Python – Fundação Bradesco – 18 horas

Projects - GitHub -

github.com/RayanBrenno

1. Various exercises using programming logic, Java, and Python.
2. A Java library system where users can search for books, register them, and manage visitors and staff.
3. Automation in Python using the PyAutoGUI library to access a government website and download invoices for companies.
4. Projects using HTML and CSS.
